

Interface West Point

Project Overview

Flooring supplies manufacturer, Interface Flooring system emphasized sustainability and environmental correctness when it sought the services of design firm, Thompson, Ventulett, Stainback and Associates for its factory in West Point, GA. A stone wall is the focal point of the design, blended with natural cedar sidings and corrugated steel to connote the state's rural appeal. Furthermore, the company's environment-friendly policy was evident in the use of chemical free fiberboards and indigenous plants for the interiors.
